

Nothing is more reassuring than knowing there is someone who cares . . .

With so many cancer resources and information available, what are the best resources for your employees, for your business and for the community? Our respected, innovative programs combine human compassion, personalized attention and comprehensive information.

- Public program for individuals
- Professional, employee and family programs
- Community resources and benefits

Cancer Care Connection is a non-profit organization founded on the principle that no one at any stage of cancer should have to face it alone. As screenings, treatment and care improve, people affected by cancer are increasingly burdened with researching and coordinating outpatient care and recovery on their own. The internet has complicated the burden of decision-making and information gathering. Our successful model of coaching and referrals allow people to access a central resource for information needs, while gaining the support, insight and experience of a professional oncology social worker and oncology nurse to assist in decision-making and determining a personal plan of action.

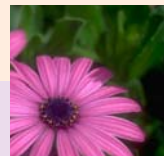

how we can help

- meals
- transportation
- work / life balance for caregivers and patients

- screening
- financial support
- insurance
- child care
- household assistance
- telling family members

- treatment options
- second opinions

- clinical trials
- medication support
- how to talk to your doctor
- sharing information with family
- what questions to ask
- where to begin for your situation, location and needs

for an individual...

Whether you are recently diagnosed, in treatment, a concerned loved one or co-worker, we can help you find answers and help. These answers cover a wide range of questions such as where to find clinical trials, how to communicate with your healthcare teams, how to manage treatment and everyday tasks and more.

We are professionals with master's degrees and extensive experience and training to...

- Help answer your immediate questions
- Listen with compassion
- Connect you with meaningful information and resources
- Help you understand and use information
- Empower you to make informed decisions
- Coach you on communicating with your healthcare teams
- Help you navigate web resources

for your business...

Did you know that one in five employees is dealing with cancer?

Businesses who care about their employees know that cancer can affect more than just the person diagnosed. Individuals, families, friends, co-workers and management face many different challenges with a cancer diagnosis. CCC's employee resource program helps with highly customized cancer intervention and prevention programs that complement existing company programs and resources.

- Our programs are customized to fit your employees and business style
- We offer coaching and resource connections that complement existing programs
- We have the experience and ability to assist employees and their families in the Delaware region and across the country
- We offer a unique custom risk reduction program
- We offer onsite programs and learning sessions

for the community..

Cancer Care Connection's mission includes the goal of community collaboration to successfully help people facing cancer. We have a rich database of over 1800 resources and community programs. Through coaching individuals, we are better able to connect people to resources, increasing utilization of the many cancer resources available and supported by community funds.

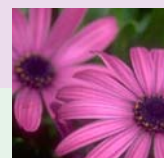

- Increase local program utilization
- Collaborations to serve more people better
- Identify and fill gaps in care and comfort

employee resource program

Our comprehensive Employee Resource Program covers cancer issues from prevention to bereavement. We help employees evaluate their risks, coach them on lifestyle changes and review screening options and resources. For employees who are affected by cancer, we are there for them, helping them find resources, empowering them to make difficult decisions and giving them the support they need.

What makes us different?

Our compassion, professional coaching, technology and experience.

did you know...

One in five Delaware employees is facing cancer as a: Caregiver / Patient / Survivor / Co-worker or Manager

With so many cancer resources and information available, how do you help your employees find the resources that are right for their situation? Finding personalized resources and information can save an employee time and reduce stress. Businesses can remain supportive AND productive if they have good support systems and resources for their employees.

However, information is only one piece of the puzzle. Many employees also need coaching to help them process the complex decisions they face in dealing with cancer.

- They may need assistance in planning their next steps
- They may need or want to find resources outside of their local area
- Employees concerned about their cancer risks may want to talk with someone to help understand screening resources and take action to reduce their risks
- Employees working with family members may want to coordinate care for a loved one together
- They may want to talk with someone about how to communicate with their healthcare team
- They may want to speak with an Oncology Nurse to better understand technical terms

The Cancer Care Connection Resource Coach® provides you and your employees with pre-qualified links to cancer resources to understand, fight and treat cancer and links to information specializing in cancer in the workplace
